DETAILED ACTION

This office action is in response to Applicant's response filed February 4, 2010. Currently Claims 1-16 are pending.

Examiner attempted to contact Mr. Paul Bobowiec prior to the writing of this office action in order to suggest potential claim amendments to place the claims in condition for allowance. Voicemails were left for Mr. Bobowiec on March 18, 2010 and two subsequent dates. No response to those inquiries was received prior to the mailing of this office action.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1-12 and 14-16, drawn to a polling method, device, computer product for utilizing a free (open, unguided) response from a first respondent to a question to add a new predetermined response option for a second respondent of the question who subsequently selects the new predetermined option, classified in class 705, subclass 10.
- II. Claim 13, drawn to a polling method determining when a free reply is substantially the same as any one of the predetermined options of the question before the input to the free reply is finished, classified in class 705, subclass 10.

The Inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as 'converting' free replies of previous poll respondents into predetermined poll question answer options. While invention II has a separate utility of analyzing, during the respondents response, the free reply to determine when it matches any of the predetermined reply options (e.g. identifying that the respondents free reply is already one of the predetermined answers to question). See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Groups I or II are not required for Groups I or II restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Paul Bobowiec, and a voicemail left, to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Examiner's Note

The instant application may disclose patentable subject matter however not all of the disclosed potentially patentable subject matter is recited in the claims. An interview with the examiner may be productive.
